## Notes for table:

- These numbers are not directly comparable to those captured in Appendix One for reasons listed below:
  - The answers captured in 'Appendix One' count the number of serious assaults by counting the number of victims. The numbers relating to non-serious injuries or no injury assaults count the number of incidents.
  - To best respond to your request, the answers captured in 'Appendix Two' count the number of perpetrators, as the focus is to identify those with gang affiliations.
  - o Importantly, the numbers in 'Appendix One' are not directly comparable to those reported in 'Appendix Two' as one perpetrator can have multiple victims, and vice-versa.
- Data provided is subject to change as incidents may be further investigated and reclassified. Accordingly, the information is not comparable to previously reported information.
