

# Proximity Detection For Visitors

Corrections is asking you to wear a smart card holder to detect close proximity interactions, for the purposes of contact tracing if required.

We don't track your movements or record any personal information.

The only data recorded is your visitor card ID and any close interactions.

If we have a positive case of COVID-19 in the prison we can quickly identify all people who may have been in close contact with that case and may need to be contacted.

Authorised users have access to the data, which will only be made available in the event of a contact tracing request.

**This is to keep all people in prison safe, including visitors and staff.**
